

Lesson Eight: First Declension Nouns (Module A)
Feminine Nouns
Morphology: The Nominal System (Part 3)
Level Three: English-Greek Vocabulary Study

This exercise encourages the student to learn all of their vocabulary well. Normally, vocabulary lists cite the Greek word with the English translation to be furnished. This exercise is in reverse--the vocabulary list cites the English translation with the expectation of the student to supply the Greek word, followed by its abbreviated genitive singular, article, and its declension-paradigm notation. All breathing and accent marks are to be placed properly on the Greek forms for the answer to be correct.
